

# ANKIT YADAV

Frontend Developer | React.js | JavaScript (ES6+) | MERN Stack

Mumbai, India – 400015 | +91 9137580969 | [ankit.y.2302@gmail.com](mailto:ankit.y.2302@gmail.com) | [github.com/ankityadav456](https://github.com/ankityadav456) | [linkedin.com/in/ankit-yadav](https://linkedin.com/in/ankit-yadav)

## PROFESSIONAL SUMMARY

---

Frontend Developer with over 3 years of experience building responsive, production-ready web applications with React.js and JavaScript (ES6+). Comfortable working across the full request lifecycle — from converting Figma designs into pixel-perfect components to integrating REST APIs and optimizing performance with Chrome DevTools and Lighthouse. Has extended into full-stack MERN development, building applications with JWT authentication and Stripe payment integration from the ground up. Works well in code review-driven teams and writes maintainable, reusable component code.

## TECHNICAL SKILLS

---

**Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Metronic UI Framework

**State Management & Routing:** React Hooks (useState, useEffect, useMemo, useCallback), Context API, React Router, Redux (basic), LocalStorage, SessionStorage

**Backend & Database:** Node.js, Express.js, MongoDB, Mongoose, RESTful APIs, JSON, Async/Await, Axios

**Authentication & Payments:** JWT Authentication, Bcrypt.js, Stripe API, Secure Form Handling

**Tools & Workflow:** Git, GitHub, Postman, VS Code, Chrome DevTools, Google Lighthouse, Webpack, npm

**Additional Exposure:** C#, ASP.NET MVC, Razor Views, SQL Server, deployment on Render and Vercel

## PROFESSIONAL EXPERIENCE

---

### Frontend Developer

May 2026 – Present

AIMBEAT Technology Private Limited — Vashi

- Build reusable React components to improve maintainability and cut down repeat development work
- Integrate REST APIs using Fetch/Axios and render dynamic data in the UI, using React Hooks for state and performance management
- Maintain cross-browser compatibility and mobile responsiveness across screen sizes
- Take part in code reviews and follow team coding standards
- Apply lazy loading and code splitting to improve application performance
- Work with UI/UX designers to translate Figma designs into responsive interfaces

### Frontend Developer

September 2023 – March 2026

Scan Infotech Private Limited — Mumbai

- Developed and maintained responsive web interfaces using React.js, JavaScript, HTML5, CSS3, and Bootstrap, ensuring consistent behavior across devices and browsers
- Built a reusable UI component library that helped standardize design patterns across multiple product modules
- Integrated more than 20 RESTful APIs across various modules, handling async data flows, error states, loading states, and real-time rendering with Axios and Fetch
- Ran performance audits with Google Lighthouse and Chrome DevTools, fixing render-blocking resources, adding lazy loading, and resolving memory leaks
- Debugged and resolved UI issues and cross-browser layout problems in production
- Worked closely with backend developers, designers, and product managers to turn Figma wireframes into production-ready code

- Maintained code quality through Git branching workflows and pull request reviews; picked up working knowledge of C# and ASP.NET MVC along the way

## PROJECTS

---

### Yumigo — Full Stack Food Ordering Application — [Live Demo](#)

*React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Stripe API, Git, Render*

- Built a full-stack food ordering platform covering menu browsing, cart management, order placement, and order history
- Implemented JWT authentication with bcrypt password hashing for secure registration, login, and protected routes
- Integrated Stripe for real-time payments, including handling of success and failure states
- Built responsive admin and user dashboards with Tailwind CSS, real-time API syncing, a dark/light theme toggle, and GSAP animations

### Personal Portfolio Website — [Live Demo](#)

*React.js, Tailwind CSS, GSAP, Getform, Git*

- Designed a responsive portfolio site with dark/light mode toggle, smooth scrolling, and GSAP animations
- Integrated Getform for a backend-free contact form and deployed on Vercel with CI/CD through GitHub
- Achieved strong Lighthouse scores across performance, accessibility, and best practices

### Other Projects (available on GitHub)

*MERN Stack, React.js, Node.js, MongoDB, Express.js*

- Employee Management System — Full CRUD application for managing employee records and roles, backed by a REST API and MongoDB Atlas
- Spotify UI Clone — Pixel-perfect recreation of the Spotify interface in React.js with functional music player controls and a fully responsive layout

## EDUCATION

---

### Bachelor of Science (B.Sc.) in Computer Science — CGPI: 8.14 / 10, Distinction

*S.I.W.S College of Arts, Science & Commerce, Mumbai | July 2020 – May 2023*

**Key subjects:** Artificial Intelligence, Machine Learning, Deep Learning, Database Management Systems, Blockchain Technology, Data Structures, Operating Systems, Computer Networks
